THE ROCCO FORTE COLLECTION

BERLIN'S ARCHITECTURAL GEM

Hotel de Rome is located in the centre of Berlin, on Bebelplatz, off Unter den Linden. It is a conversion of a building constructed in 1889 by architect Ludwig Heim (appointed master builder of the government), which housed the head office of Dresdner Bank until 1945. This is one of the few luxury hotels in Berlin located in an original building making use of its full architectural splendour and thereby offering guests an authentic Berlin experience.

The ornate and classical design of the original building has been given a contemporary twist by designer Tommaso Ziffer, who also designed the Hotel de Russie in Rome. Tommaso Ziffer has been assisted by architects Aukett+Heese with Olga Polizzi and her design team at Rocco Forte Hotels.

The restaurant Parioli seats up to 120 and looks onto a large external terrace which will be used for al fresco dining during the summer months. Our chefs offer a cuisine based on traditional Mediterranean cooking. The Bebel Bar has a contemporary feel. It features a long bar overlooking Bebelplatz and a colonnaded area. The Opera Court is a grand room with its original glazed ceiling. It is the focal point for coffee and afternoon tea.

The magnificent roof top terrace of Hotel de Rome offers breathtaking and spectacular views of the historical centre of Berlin. Not only the Berlin State Opera and the Cathedral of St. Hedwig, but also the cathedral Berliner Dom, the TV tower and many other highlights of the city are literally within grasp.

The spa has a steam, sauna and relaxation area, and a fully-equipped gym. The original vault of the bank has become a 20 metre swimming pool. A range of therapies and health and beauty treatments are provided in the six treatment rooms.

The impressive ballroom has a double-height ceiling with a glazed roof and accommodates receptions for up to 220 people. The hotel has five meeting rooms and can accommodate up to 120 people. All have natural light, are equipped with the latest technology, and can be accessed via a separate entrance.
